Powered By Metal, Guided By Inner Strength, Since 1912

Winter 2010 • Vol 1 Issue 1

## TURNING SCRAP METAL INTO AWARDS

ABC has been honored with some impressive recognition recently. This fall, we were thrilled to learn CEO **David Yochlowitz** was selected as one of this year's Pacific finalists for the **Ernst & Young Entrepreneur Of The Year Award**. David was nominated in the Family Business category. In its 16th year, this prestigious awards program honours the best of our country's entrepreneurial success stories. This nomination was especially rewarding given that it came during one of the most challenging economic climates in recent history. **Ernst & Young** looked for finalists who embrace innovation and display an ability to adapt quickly, as they believe these companies will be the future leaders.

We attended an excellent awards gala where Ryan Beedie of the Beedie group was announced as the winner. We'd like to express our heartiest congratulations to Ryan and his team! We were delighted to be listed amongst a group of highly admirable organizations.

## EXPORTER OF THE YEAR AWARDS

A second honour was recently bestowed upon us by the BC Government. We were named as one of BC's top 25 exporters under the sustainability category and, subsequently, a contender for the Exporter of the Year Award. This prestigious accolade, which went to IMW Industries in Chilliwack, recognizes the single best export business in the province, across all industry sectors. We were very proud to be listed in the top 25 as this award acknowledges businesses that contribute to the BC economy through economic growth in their community, new investment and job creation. Since 1912, our organization has held strong values for local community support.

## Kidney Metals Can Help Your Business

If your business has scrap metal to dispose of, consider donating it to Kidney Metals. It's an easy way to support a good cause.

**All kinds of ferrous and non-ferrous metals** are accepted, but some specific examples are construction materials (beams, rebar, pipes, etc.), old machinery, aluminum, copper, window frames, electrical wire and much more. You can either drop off metals at an ABC Recycling location, or you can request our **convenient pick-up service**. A bin will be brought to your location and, once collected, the materials will be removed to an ABC Recycling location for recycling. The total metal is weighed and valued, and your business will be provided with an **official tax receipt**. It's an easy way to make a big difference in the lives of those living with kidney disease.

## Kidney Car Program

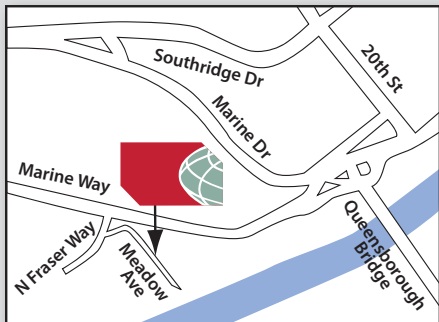

ABC Recycling will also be the local recycler for The Kidney Car Program, a national fundraising initiative run by the Kidney Foundation of Canada. If you've got an old or unwanted vehicle, you can donate it to the Kidney Foundation. Some vehicles are sold, others recycled. Vehicles that are to be recycled will be sent to us for processing with all proceeds donated to the foundation. Car donors will receive a free tow, a tax receipt, plus an excellent dose of good karma. Call: **1-800-585-4479**.
